

## L2 Certificate in The Prevention & Control of Infection

### Course Overview:

This programme is aimed at individuals within the healthcare sector and is designed to enhance awareness of issues associated with infection prevention and control. The course content will assist learners to understand the requirements of micro-organisms and how to identify routes of transmission.

The programme covers the principles and steps of the decontamination process and correct, safe use of personal protective equipment. Learners will investigate the importance of correct waste disposal and the safe removal of bodily fluid spillages.

### Course Content:

- Principles of the causes and spread of infection.
- Principles of the importance of personal hygiene and health in the prevention and control of infection.
- Principles of decontamination, cleaning and waste management.
- Principles of infection prevention and control.
